

Week 10: Universe

BIG IDEA

Even without Scripture telling us God created the world, nature itself shows fine-tuning: atmosphere, rotation, distance from the sun, all calculated just so for life. This lesson asks whether the universe is random chance or a well-crafted design, and what a fine-tuned home says about God's character.

KEY POINTS FROM THE LEADER VIDEO

- The viral bottle flip looks like luck, but it's really fine-tuning: the right bottle, amount of water, and spin make it land every time.
- Genesis tells us God created and designed the world, but even without Scripture, nature itself tells us the same thing through its fine-tuning.
- Everything is calculated just so, so we can survive and thrive; the question is whether that's random chance or a well-crafted design by God.
- This week's one word is 'thinking': last week introduced science furthering faith, and now students start putting the pieces together themselves.
- Fine-tuning doesn't just show evidence God exists or made earth habitable; it shows he created a home for us, with his heart and love in mind.

SCRIPTURE

Genesis

DISCUSSION QUESTIONS

1. What does fine-tuning say about the character of God?
2. If you didn't have Scripture, what would nature itself tell you about God's design?
3. Did this world pop into existence by random chance, restarting until it worked, or was it crafted with the right conditions for life?
4. What does it mean that God made not just a habitable planet, but a home for us?
