

Week 12: Designer

BIG IDEA

The science unit closes with three pieces of evidence pointing to God: fine-tuning, DNA, and design. This week watch two kinds of students: the fired-up arguer, who needs to challenge with truth, love, and respect, and the still-unsure student, who needs you to ask whether the evidence was enough.

KEY POINTS FROM THE LEADER VIDEO

- Science is a foundation for understanding our world and does not contradict our faith; fine-tuning, DNA, and design all point to God.
- With design, the conversation between creation and evolution really comes alive, and some students will be fired up to argue with teachers who know more.
- Champion those students rather than telling them not to engage, but make sure they challenge in truth and love, with appropriate respect for teachers.
- For students still not sure, take inventory and ask plainly: was this enough evidence, do you need more, what further questions or clarifications remain?
- The goal of the study is deep personal conviction about what students believe and why, communicated in love and humility, relationally.
- Help eager students be patient about jumping into arguments, because there is so much more to learn.

DISCUSSION QUESTIONS

1. Which of your students are fired up to argue, and how can you help them challenge others in truth, love, and respect?
2. Which students are still unsure, and have you asked them plainly whether the evidence was enough or what questions remain?
3. How do fine-tuning, DNA, and design each point to God through science?
4. How can you help eager students stay patient when there is still so much more to learn?
