

Week 17: Miracles

BIG IDEA

The point is not just proving miracles exist, but that miracles point to God's existence. Students first pin down what a real miracle is, versus parking spots and figures of speech, then wrestle with whether miracles are possible and still happen today, groundwork for next week's lesson on the resurrection.

KEY POINTS FROM THE LEADER VIDEO

- Because there are miracles, God's existence is pointed to; 1 Kings 18, Elijah and the prophets of Baal, was chosen to show God's sovereign power.
- The intro experience asks students to name improbable events, helping them define a biblical miracle versus a lucky parking spot or the so-called miracle of birth.
- For this week's storyteller, consider a student who has witnessed a miracle, like the trusted student who saw a girl's legs healed in Africa.
- Students are conditioned to assume science explains everything, but science cannot explain the supernatural; help them see what science can and cannot explain.
- Students will ask why such miracles, like the lame man healed at the temple, don't happen today; we cannot say they don't, and God can.
- Have leaders note whether students are convinced miracles are possible and have happened; ask the unconvinced what it would take, ahead of next week's resurrection lesson.

SCRIPTURE

1 Kings 18

DISCUSSION QUESTIONS

1. What is the most improbable event in human history you can think of?
2. What counts as a real miracle, and what is just an improbable or lucky event?
3. Are you convinced miracles are possible, and that they have happened around you? If not, what would it take?
4. Why might God heal one person and not another, and how do we walk with someone through that?
